

To all Razorback Players and Families,

With the current events regarding COVID-19, we wanted to send a quick note with regards to the upcoming Rockford Razorbacks events and scheduling.

Our number one concern at this time is the health and safety of you, your families, and our community. We are in a unique situation of having 90+ players from 35+ schools in the area, so we feel it is prudent that we do our part to prevent the spreading of any illness to any player, family, or school.

Because of this, **we will suspending all organized Razorbacks activities through March 27th.** This will coincide with the 2 week school closure in the state. At that time we will reevaluate and, based on the recommendations in the area, determine if our activities should begin again.

We are asking that there be no organized practices by players or parents at this time. **However, we are strongly encouraging players to continue development on their own. Please continue your personal workouts, go outside, get some exercise, and practice your cradling, shooting, and wall ball.**

We understand that there may be some frustration regarding this situation, however as a large local community organization, we feel very strongly about keeping our communities and our families safe. Thank you for your understanding during this difficult time.

Thank you

The Rockford Razorbacks

An excerpt from a recent US Lacrosse article:

These are uncertain times. These are the times when we turn to sports to turn away, even if only for a few minutes or a few hours.

Medicine game, right? But that's off the table. TV, movies, books and video games may fill some of the void. Maybe we'll start talking to each other on the phone again. Maybe we'll put down our phones for a little bit, too.

The world will be different on the other side, but we will get through this. We'll bring out the best in each other. We're all on the same team now. We each have a part to do. We can overcome the opponent if we work together toward a common goal. And when it's over we'll hear the cheers again, too.

After all, sports did teach us something.
